Discourse
- Exchange of ideas in writing or speaking, adapted to specific contexts and developed through discovery, analysis, creation, presentation, and evaluation. A student who is competent in discourse demonstrates the ability to reason, write, and speak effectively for academic, professional, and public purposes. In meeting the Discourse LO, students will demonstrate increasing proficiency over the years. All learning indicators would be met in all courses, but expectations for proficiency would be heightened for advanced/applied courses.

Credit hours: 9 credits – 6 foundational + 3 advanced/applied writing and/or speaking courses

Quantitative and Computational Thinking
- Creative engagement with the world by the manipulation of precisely defined symbolic representations. Quantitative thinking is the formulation of questions that can be addressed using mathematical principles, leading to answers that include reliable and usable measures of accuracy. Computational thinking is the ability to conceive meaningful, information-based representations of the world that can be effectively manipulated using a computer. Courses or course sequences addressing this outcome must meet a majority of the learning indicators. Only the combination and integration of quantitative and computational courses will serve to meet this learning outcome.

Credit hours: 9 credits – 6 foundational + 3 advanced/applied

Reasoning in the Natural Sciences
- Involves the acquisition of the detailed knowledge of one or more of the natural sciences, hands-on experience with how science is conducted, what science can and cannot tell us about the universe, and the relationship between science and society. Courses or course sequences addressing this outcome must meet a majority of the learning indicators.

Credit hours: 6 credits (with an additional 2 lab credits for students in some majors)
Critique and Practice in Design and the Arts

- A hands-on, minds-on approach by which students acquire the intellectual tools for a richer understanding and knowledge of the process, meaning and value of the fine, applied and performing arts and creative design. This outcome recognizes that the creative design process can and should be applied to a broad range of disciplines. Courses or course sequences addressing this outcome must meet a majority of the learning indicators. To meet this learning outcome, students will study the arts and design thinking in two courses: either 1 design and 1 arts course, or 2 integrated courses.

- **Credit hours**: 6 credits – 3 design + 3 arts, or 6 integrated design and arts

Reasoning in the Social Sciences

- Utilization of quantitative and qualitative methods to explain the behavior and actions of individuals, groups, and institutions within larger social, economic, political, and geographic contexts. Courses meeting this outcome will help students to understand that they are a small part of a larger global community and to engage with diverse individuals, groups, and ideas that have shaped or continue to shape the worlds they inhabit. Courses or course sequences addressing this outcome must meet a majority of the learning indicators.

- **Credit hours**: 6 credits

Critical Thinking in the Humanities

- Interpretation and analysis of texts and other created artifacts to understand ideas, values, and identities in various spatial, cultural, and temporal contexts. Courses or course sequences addressing this outcome must meet a majority of the learning indicators.

- **Credit hours**: 6 credits
Critical Analysis of Equity and Identity in the United States

- Explores the ways social identities related to race, ethnicity, gender, gender identity, gender expression, class, disability status, sexual orientation, religion, veteran status, economic status, age, and other socially salient categories and statuses, influence the human condition and experience, with focus on the United States in particular or in comparative perspective. It recognizes that people in society have had different experiences and opportunities related to social categories, and challenges students to consider their ethical responsibilities to others in that context and in the context of Ut Prosim, to enhance their capacities to be engaged citizens and visionary leaders in an increasingly diverse society. Students will gain self-awareness of how they are situated relative to those around them based on social identities and foundational knowledge of the interactive dynamics of social identities, power and inequity.

Courses addressing this outcome must meet a majority of the learning indicators.

- Credit hours: 3 credits (may be double-counted with another core outcome)

Learning Indicators
1. Analyze how social identities, statuses, space, place, traditions, and histories of inequity and power shape human experience in the United States (particularly or in comparative perspective).
2. Analyze social equity and diversity in the United States (particularly or in comparative perspective) through multiple perspectives on power and identity.
3. Demonstrate how creative works analyze and/or reimagine diversity in human experiences in the United States (particularly or in comparative perspective).
4. Demonstrate how aesthetic and cultural expressions mediate identities, statuses, space, place, formal traditions, and/or historical contexts in the United States (particularly or in comparative perspective).
5. Analyze the interactive relationships between place, space, identity formation, and sense of community in the United States (particularly or in comparative perspective).

Integrative Outcomes

Ethical Reasoning

- Principled evaluation of moral and political beliefs and practices. In today’s complex and diverse world, ethical behavior requires more than just the desire to do the right thing. Foundational learning of ethical theories, issues, and applications provides tools that enable students to deliberate and to assess for themselves claims about ethical issues in their personal, public, and professional lives.

Courses addressing this outcome must meet a majority of the learning indicators.

- Credit hours: This learning outcome will be met in conjunction with Core Outcomes. No extra hours will be necessary.

Learning Indicators
1. Explain and contrast relevant ethical theories.
2. Identify ethical issues in a complex context.
3. Articulate and defend positions on ethical issues in a way that is both reasoned and informed by the complexities of those situations.

Intercultural and Global Awareness

- Supports effective and appropriate interaction with a variety of people and different cultural contexts. Considerations of diversity and inclusion are crucial for students in an increasingly complex world. An important application of this learning is the critical analysis of global systems and legacies and their implications for people’s lives and the earth’s sustainability. Courses addressing this outcome must meet a majority of the learning indicators.

- Credit hours: This learning outcome will be met in conjunction with Core Outcomes. No extra hours will be necessary.

Learning Indicators
1. Identify advantages and challenges of diversity and inclusion in communities and organizations.
2. Interpret an intercultural experience from both one’s own and another’s worldview.
3. Address significant global challenges and opportunities in the natural and human world.
Distributive Pathway

- Traditional model, similar to Virginia Tech’s Curriculum for Liberal Education
- Students choose courses from different categories, mandated by credit hour requirements
- Many transfer courses may be equivalent to these learning outcomes

Pathways Minor

Cross-disciplinary minors will be offered to provide students the chance to broaden their academic scope. All Pathways Minors must:

- Include 18 credits and a capstone
- Be offered by an academic department
- Include courses that meet at least three core outcomes and both integrative outcomes
- Provide eligibility to all undergraduate students
- Thematic Minors will be proposed

Alternative Pathway

High impact learning experiences offered in order to meet general education outcomes with more flexibility. All Alternative Pathways must:

- Meet three core outcomes and both integrative outcomes
- Be overseen by a faculty advisor
- Be submitted and approved by UCCGE prior to being offered

This Pathway could include: Study Abroad, Co-Curricular experiences, Undergraduate Research, Presidential Global Scholars, and others.

Pathways Options

Pathways Minor
(some students)
18 credits
(out of 45)

Pathways Requirements for All Students
45 credits

Alternative Pathway
(some students)
min 9 credits
(out of 45)

Pathways Curriculum requires a total of 45 credits to fulfill the 7 core outcomes and both integrative outcomes. Students might pursue a minor or an alternative Pathway as means of completing a portion of the requirements.
